

VIRGILE BARBERA

Versatile Professional in **Software Development**, **Project Management**, and **Data Engineering**

PROFESSIONAL EXPERIENCE

VDI Assistant – Paris Air Show (SIAE) – Fixed-term contract

March 2025 – June 2025

- Developed an internal building supervision application (Node.js backend), with API exposure for the front-end interface.
- Designed and deployed a real-time monitoring platform for the electrical infrastructure of critical zones and Wi-Fi terminals at the event.
- Acted as the technical liaison between internal teams and the external service provider managing hardware and application access.
- Coordinated and monitored technical installations (Wi-Fi access points, geolocation devices, VLANs, fiber optics, cameras, etc.) carried out by various contractors.

Developer & Project Manager, OptiXt (Full-time)

August 2022 – MAY 2023

- Developed software for automated HR file processing and report generation (including FTP retrieval, data encryption management, etc.)
- Led Angular development to fully redesign the SaaS application
- Authored operational documentation
- Handled Level 3 support requests and maintained the legacy solution
- Conducted experiments with various technologies to improve the quality and reliability of internal tools

Developer & Project Manager, OptiXt (Fixed-term Contract)

August 2021 – July 2022

- Developed software for automated EDI file processing and report generation
- Created tools for bulk email sending and processing
- Authored operational documentation
- Developed various PowerShell scripts (for backups, archiving, email management, etc.)

Developer, OptiXt (Apprenticeship)

September 2020 – August 2021

- Refactored and optimized the Winflotte software, implementing bug fixes and feature enhancements
- Resolved tickets related to software and database issues

Support Technician (Levels 0, 1, and 2), OptiXt (Apprenticeship)

September 2018 – September 2020

- Resolved support tickets requiring varying levels of expertise
- Conducted reverse engineering on company software code
- Gained proficiency in the Citrix production environment
- Performed workstation and server administration tasks
